About the Company

Burak Contracting supplies sweet water, potable water and construction water to sites across the Kingdom of Saudi Arabia. We were built for one purpose: to make sure that a shortage of water never becomes the reason a project stops.

From a single emergency tanker at midnight to a twelve-month contract feeding an infrastructure package, we plan every delivery around your programme - not ours. Our dispatch team confirms every booking, our drivers are briefed on site access and HSE rules, and every load is documented with a signed delivery note.

OUR MISSION

To deliver clean, reliable water to every site we serve - on schedule, safely documented, and supported by a team that answers the phone.

OUR VISION

To be the water supply contractor that Saudi construction and industrial clients name first when reliability actually matters.

Our Values

- Reliability
- Safety First
- Transparency
- Responsiveness
- Respect for the Customer
- Long-Term Partnership

By the Numbers

Our Services

Construction Site Water Supply
Reliable water delivery for construction sites - compaction, curing, dust suppression and site welfare.

Bulk Water Delivery
Large-volume water supply for projects, facilities and storage tank filling.

Water Tanker Delivery
Professional tanker-based delivery with capacities from 10,000 to 30,000 litres.

Emergency Water Supply
Urgent water delivery when a pump fails, a pour is running or supply is interrupted.

Project Water Contracts
Long-term and project-based supply agreements with fixed rates and guaranteed availability.

Camp & Accommodation Supply
Daily potable and domestic water supply for worker accommodation and labour camps.

Industrial Water Supply
Process, cooling and washdown water delivery for factories, plants and warehouses.

Commercial Water Delivery
Flexible water supply for compounds, malls, events, farms and commercial facilities.
